

```
1 public class Card
2 {
3     String suit;
4     int rank;
5
6     public static void main(String[] args)
7     {
8         Card a;
9         Card b;
10        Card c;
11
12        a = new Card();
13        a.suit = "ハート";
14        a.rank = 12;
15
16        b = new Card();
17        b.suit = "スペード";
18        b.rank = 3;
19
20        c = b;
21        c.rank = a.rank - 2;
22
23        System.out.println( b.rank );
24    }
25 }
```
